

UN Conference Population Action Plan

You are the ambassador to the country of :

Part 1 - Country Report

In this project, will be part of a U.N. Committee that deals with problems associated with population. You will represent a country, and do some research on this country. You will be using the internet to do your research. You will use this research to figure out if **your country has a population problem**. You will organize your data into a graphic organizer, and then present your findings in one paragraph **summary**.

To find data, go to www.bpmsgeography.wikispaces.com and click on the data page.

Part 2 - Brochure

Once you've collected and summarized the Data on your assigned country, You'll present your data in a brochure. We will present our brochures in a "U.N. Conference." In your brochure you will present:

- ☐ The population problems your country is facing
- ☐ Data to support your claim
- ☐ Solutions that would help your country's population problems
- ☐ Why should the U.N. Give money to support your country?
- ☐ Pictures and graphs will increase your score. (You can print up to 2 pieces of paper)

If you prefer, you may do something other than a brochure (keynote, poster, comic strip, rap song, music video, etc.) Check with Ms. Giebultowicz.

Refer to the rubric to make sure you've met all the criteria!

Remember... countries all over the world sometimes have cultures and customs very different than our own. Just because we may not understand a custom of a different country, that does not make it right or wrong; it makes it unique. We need to wear our **cultural sensitivity glasses** when we study places around the world.
